Your 4-Year Journey at Team Academy

What you can see below is a visual of what to expect during your four years at Team Academy.

1. Starting at the vertical orange bar, you'll see the four years and the stages your business generally will be in: Start, Develop, Grow, and Evaluate.

2. The top black bar show the *learning lines* or main subject areas we focus on in the program: Entrepreneurship, Leadership, Creation & Commercialisation, and Integrated Skills

3. Per year, you can see in the grey squares which subjects you'll have in which *learning line.* For example, in year one, you'll have English as an integrated skill, and in year three, you'll have Leadership Strategy to learn more about leadership.

4. Finally, the curve with the rocket is **you and your team**. You touch point on all the *learning lines* each year, you go through phases, such as the learning journey, start up week, and evaluation week, and as a team, you'll have business & team coaching and customer visits. At the end of the four years you will graduate in a high performing team!
